- Nationwide 24/7 Support

HARDWARE SPECIFICATION AND PROCUREMENT

Our certified technicians specify, select and procure the digital signage hardware components that best fit your unique environment, goals and objectives. We procure the displays, players, routers, switches and servers needed for the network solution. Each component is meticulously staged, configured, tested and re-tested.

CONNECTIVITY

What really sets SageNet Digital Signage Solutions apart is an understanding of the interrelationships of all network-dependent applications and how each impacts overall connectivity. This connectivity-conscious approach provides every customer with the industry's broadest range of network services, security, access and coverage options, while low-ering their total cost of network ownership.

Our experience with in-store wiring, Wi-Fi and structured cabling ensures that your local area network delivers secure, robust connectivity to every device and every corner in your store.

MAINTENANCE AND MANAGED SERVICES

Our Network Operations Center provides 24x7x365 support including comprehensive network management, as well as monitoring of Digital Media Players (DMP) and displays to provide detailed device management, screen diagnostics and alerts.

Our experience in the design, deployment, monitoring and support of multi-site digital signage solutions includes:

- Configuration
- On-site Installation
- Cabling
- Nationwide Break/ Fix Maintenance
- Data Network Provisioning
- Help Desk Services
- 24x7x365 Remote Monitoring
