

Connect Series – Partner Edition

Tiered Managed Network Services Made Easy

To ensure network efficiency, availability and ROI, more and more companies have discovered that outsourcing network operations simply makes sense. The SageNet Connect Series brings clarity to Managed Network Services by providing customers a suite of offerings packaged according to the customer's precise needs.

The SageNet Connect Series provides four distinct levels of coverage that allows customers to select the ideal level of services for their specific operations environment and budget:

- SageNet ClassicConnect™
- SageNet AssuredConnect™
- SageNet ManagedConnect™
- SageNet CompleteConnect™

	ClassicConnect	AssuredConnect	ManagedConnect	CompleteConnect

Network Change Management	✓	✓	✓	✓
Customer Portal & Ticketing System	✓	✓	✓	✓
Network Monitoring & Alert Notification		✓	✓	✓
Network Performance Statistics		✓	✓	✓
Broadband Circuit Proactive Management		✓	✓	✓
Managed Router Service		✓		✓
Managed Firewall Service		✓		✓
Managed VPN Service		✓		✓

SageNet ClassicConnect™ Services

COST-EFFECTIVE, HIGH-SPEED CONNECTIVITY TO EVERY SITE IN YOUR NETWORK

SageNet ClassicConnect Services are ideal for multi-site organizations that desire a single point of contact, circuit provisioning and day-to-day maintenance. Customers benefit from the simplicity of a single billing statement (rather than invoices for hundreds of circuits, from possibly dozens of providers). SageNet ClassicConnect Services include:

- Solution Design
- Project Management
- Installation Services
- Consolidated Invoice
- Broadband Help Desk
- Web Portal

SageNet AssuredConnect™ Services

VPN CONNECTIVITY, PROACTIVE NETWORK MONITORING & SUPPORT

SageNet AssuredConnect Services are ideally suited for multi-site networks with pre-existing broadband access in need of a managed VPN solution, including router management, network security and compliance-related functionality. SageNet AssuredConnect Services offer the security and reliability of SageNet's Virtual Private Network (VPN) offerings, including:

- Managed VPN Aggregation & Security
- Secure Configuration Management
- Managed Firewall Service

SageNet ManagedConnect™ Services

HIGH-SPEED CONNECTIVITY, NETWORK MONITORING, ALERT NOTIFICATION, ANALYTICS

SageNet ManagedConnect Services are designed for customers who prefer a single point of contact for network rollout, ongoing network management and real-time visibility into network performance. SageNet ManagedConnect Services include all the services under SageNet ClassicConnect plus:

- Network Monitoring and Alert Notification
- Network Performance Statistics
- Proactive Circuit Management (SageNet monitors the circuit. Should a problem arise, we immediately inform the customer and work with the service provider to resolve the issue.)

To learn more about the SageNet Connect Series, visit our website, www.sagenet.com, or call 1-866-480-2263.

SageNet CompleteConnect™ Services

NETWORK DESIGN, VPN CONNECTIVITY, COMPLETE MANAGEMENT & SUPPORT

SageNet CompleteConnect Services provide customers full lifecycle network design, implementation, operations and management. SageNet's CompleteConnect adds managed router, firewall and VPN to the SageNet ManagedConnect services. Solution design provides a complete review of business, security and bandwidth requirements – including analysis of broadband connectivity from multiple sources – to deliver the most reliable, secure and cost-effective network available.

Value-add Services

SageNet offers a variety of value-add services to maximize network ROI, including:

- **Managed Security Services** including Advanced Threat Protection (Anti-Virus, Anti-Spam, IPS/IDS Data Leak Protection, Content Filtering) and Secure Remote Access
- **Digital Signage Services** include a complete range of multi-site solutions, from system design and installation to network infrastructure and centralized management
- **Managed Wi-Fi and Data Analytics** including Rogue Detection, Secure Access and Guest Wi-Fi, Usage Statistics, Optimal Coverage Heat Maps, Deployment Pre-planning, RF Monitoring and Alerts, and PCI Reporting
- **PCI Compliance Services** including PCI Scans & SAQ Assistance, PCI WAP Scanning, SIEM Logging
- **Unified Communications as a Service** facilitates collaboration and integrates all your real-time communications – VoIP, video, mobile, and more

SageNet Managed Network Services

OPTIMIZED NETWORKS FOR MULTI-SITE ENTERPRISES

SageNet's Managed Network Services offer the industry's broadest range of network services and coverage options. Every SageNet-optimized network is backed by over 30 years' experience and a state-of-the-art, nationwide service and support organization.
