

MANAGED WI-FI SOLUTIONS

Maximizing Connections for your Business

SageNet's Managed Wi-Fi Solution, SageWi-Fi™, leverages wireless and mobility solutions to deliver an exceptional customer experience, and increase employee productivity. With 20 years' experience managing wireless devices, SageNet has the experience and innovation to offer unique wireless solutions with proven results. SageNet delivers comprehensive, real-time monitoring, management and support of mission-critical assets and wireless networks to meet the demanding requirements of your organization.

GUEST WI-FI

Increase brand loyalty and encourage customer engagement with free or paid wireless services

INTEGRATIONS

Integrate with your loyalty database and payment processor of your choice, expanding Wi-Fi management and marketing opportunities

NETWORK ANALYTICS

Reporting and analytics on network health and usage. Establish IT standards to monitor and predict issues.

SageNet is a leading provider of complete, turnkey wireless infrastructure monitoring and management services for high-speed Internet access. SageWi-Fi helps improve the quality and reliability of Internet access, while also elevating the guest experience with unique branding and mobile integration, driving improvements in brand equity, productivity, efficiency and transparency.

Every SageNet managed services solution is backed by three 24/7 NOC/SOCs, central National Logistics Center, and a nationwide field services organization.

sageWi-Fi™
