# CONNECTIVITY that EMPOWERS PUBLIC SAFETY

FOR THOSE WHO PUT IT ALL ON THE LINE, THE LINES OF COMMUNICATION ARE MORE CRITICAL THAN EVER. THAT'S WHY SOME OF THE NATION'S MOST DEMANDING ORGANIZATIONS RELY ON SAGENET FOR RELIABLE, SECURE, AND COST-EFFECTIVE COMMUNICATIONS. NO MATTER WHERE, NO MATTER WHEN...

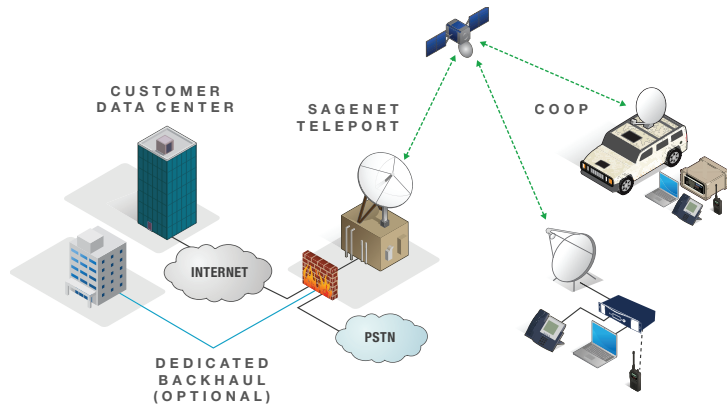

NO MATTER WHAT.

# EMERGENCY COMMUNICATIONS

## Empowering Sure, Secure Communications

Data. Voice. Video. Communications technology has converged to provide powerful, even life-saving, tools. However, the same event that creates the emergency can take down established networks. That's why the nation's leading organizations count on SageNet emergency communications solutions.

SageNet offers a comprehensive range of fixed and transportable SageNet Satellite Services for emergency response, disaster recovery, network back-up and continuity of operations, including:

- **WAN back-up/restoration** solutions provide high-speed connections supporting data, voice and video, completely independent of ground system/terrestrial infrastructure.
- Transportable 'command posts' can be deployed in less than ten minutes to serve as a **mobile "hotspot"** for converged data, voice, and video communications.

Perhaps most importantly, SageNet has the resources and expertise to back it all up, including 24/7/365 network operations centers, a nationwide support network, and more than 30 years experience in high-speed, high-availability communications solutions.

For more information on SageNet communications solutions, visit [www.sagenet.com](http://www.sagenet.com) or call 866.480.2263

# SERVICES

## Emergency Communication Services

To help ensure organizations of all sizes balance the "possible" need for emergency connectivity with the certainty of budget constraints, SageNet Satellite Services include the Emergency Communications Service (ECS) suite, available on a "pay-as-you-use" basis. Powered by the field-proven SkyEdge® II-c VSAT technology, SageNet's ECS offers affordable satellite-based emergency connectivity, up to 15 Mbps, with low contention ratios and high SLAs. Our SageNet ECS packages allow users to select the service that best meets their specific bandwidth, budgetary and mission requirements:

## VSAT PLATFORM

- **SkyEdge® II-c.** Modular, two-way VSAT enabling broadband IP access and multicasting. Ideal for rapid access to the Web, VoIP, enterprise connectivity and multimedia applications. Also available in a hardened rapidly-deployable case.

# PRODUCTS

## Field-Proven Technology for the Toughest Environments

SageNet offers a wide range of satellite equipment options that meet the varying operational requirements of public safety agencies, including fixed and transportable antennas, and field-proven and advanced VSAT technology platforms.

## ANTENNAS

- **Transportable Flyaway Antennas.** Case-deployable auto-point antennas that can be operational in minutes.
- **Vehicle Mounted Antennas.** Field-proven, rugged antennas can be mounted on vehicles of almost any size.
- **Fixed Antennas.** Durable, high-performance antennas for permanent COOP installations. High-wind mount antennas also available.
- **Mobile Command Vehicles/Tactical Trailers.** Integrate mobile and terrestrial assets together to provide a communication architecture that links video, voice and data networks together giving you the same capabilities you have in your fixed Emergency Operations Center.

## THE SAGENET ADVANTAGE

Natural or man-made, large-scale or local, when disaster strikes, coordinated command and control is vital to fast response, to saving lives, and to sustained recovery. That's why SageNet Satellite Services provide the ability to communicate, no matter where, no matter when... no matter what. SageNet emergency communications solutions offer:

- Emergency Response, COOP and Back-up Solutions
- High Service Level Agreements (SLA)
- Affordable, Always-on, Part-time Usage Plans
- Full Support for Data, Voice and Video
- Deployable on Mobile Command Vehicles, Trailers and Other Fixed and/or Transportable Configurations
- 24 x 7 US-based Premium Customer Support
