NEIL CHRISTIE

SageNet, Director of Cybersecurity Solutions Architecture

Neil Christie is passionate about ensuring the security of what is important to SageNet customers, no matter the industry or its challenges. His over 20 years of experience in Information Security has made him an expert in his field.

Previous Experience

Senior Systems Engineer for Symantec Corporation

• As the largest security solutions company in the world, Symantec provided opportunities to work with large enterprises and healthcare systems. Neil's experience with these environments is brought to each and every SageNet customer engagement.

Information Security for the Banking Industry

• Over 20 years of experience in banking resulted in a broad knowledge of the industry and its security concerns. Neil's areas of focus included configuration and management of enterprise security solutions, development of security metrics and risk management practices, and managing teams of information security professionals.

Topics Neil can speak on

• Management of modern EDR and security monitoring programs
• Open source security tool usages
• Vulnerability management programs using risk-based models
• DevOps and how security can be baked in
• Cybersecurity for the Internet of Things

Additional Expertise

• Holds the HealthCare Information Security and Privacy Practitioner (HCISPP) certification and is knowledgeable in healthcare security practices
• Is a Certified Information Systems Security Professional (CISSP) and very experienced with assessing, implementing and managing cybersecurity programs

About SageNet

SageNet is passionate about trusted connections. The company believes that by creating, discovering and nurturing trusted connections with its customers, associates and community, SageNet enhances the world that connects us all.

As a leader in managed network and cybersecurity services, SageNet connects, manages and protects technologies and devices across the enterprise. The company offers world-class service and support via its three US-based 24/7 Network Operations Centers (NOCs) and Security Operations Centers (SOCs), geographically-diverse teleports, a central National Logistics Center, multiple data centers, and a nationwide field service organization.

With a three-decade track record in managed services, SageNet boasts a long-term customer base that includes the nation's largest retail, healthcare, financial, utilities and energy organizations. SageNet manages communications at more than 220,000 endpoints. Headquartered in Tulsa, SageNet has regional offices in Washington, D.C., Atlanta, Chicago and Philadelphia.

> *My passion is finding ways for organizations to function securely from start to finish. I begin by having a conversation with our client, then we design a solution for their specific need, I help with project management, and we deploy the product. The most important part is finding the security solutions that fit each unique situation and protecting organizations from cybersecurity threats.*
